SUMMARY

Backend-focused Computer Science student with experience building full-stack applications using Python, FastAPI, SQL, REST APIs, JSON, and relational databases. Skilled in client-server architecture, API development, database persistence, Git workflows, and cloud deployment.

EDUCATION

Rutgers University–Newark — Newark, NJ
B.S. in Computer Science, Minor in Mathematics | May 2026

Hudson County Community College — Jersey City, NJ
A.S. in Computer Engineering Technology | May 2024

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Computer Systems

TECHNICAL SKILLS

Languages: Python, C, JavaScript, SQL, HTML, CSS

Backend: FastAPI, REST APIs, JSON, Web Services, API Integration, Client-Server Architecture

Databases: PostgreSQL, SQLite, SQLAlchemy, Relational Database Design

Frontend: React, Vite, Tailwind CSS, Recharts

Cloud/Tools: Git, GitHub, Vercel, Render, VS Code, Uvicorn, Command Line, Environment Variables

PROJECTS

EvalForge — Backend-Driven Full-Stack Evaluation Platform

[Live Demo](#) | [GitHub](#)

Tech: Python, FastAPI, SQLAlchemy, PostgreSQL, SQLite, React, Vite, Tailwind CSS, Recharts, OpenAI API

- Built and deployed a client-server application using React, FastAPI, SQLAlchemy, and SQL databases to support model comparison, experiment storage, scoring workflows, and analytics dashboards.
- Designed REST API endpoints and SQLAlchemy models for creating, retrieving, and analyzing evaluation experiments through structured JSON responses.
- Integrated backend-protected API calls using environment variables to separate external service access from the frontend.
- Debugged API routing, CORS, database configuration, deployment, and environment variable issues across local and hosted environments.

CERTIFICATIONS

Google Associate Cloud Engineer — In Progress
